
Fall Course: Session Arc

SESSION PRINTED WED 12 AUG 2026

Re-sequence the eight studio sessions so the arc earns its final week.

I PROPOSE

01 The map and the ground rules
why this field exists; what we won't automate

02 Tools as instruments
first contact, small wins, no theory yet

03 The brief that resists
a problem AI answers badly on purpose

04 Taste as a skill
critique week; judging output, not making it

05 Agents and delegation
handing off work, keeping judgment

06 Field week
out of the building; collect, observe, log

07 The human layer
what stayed human in weeks 1-6, named out loud

08 Ship and defend
final work presented against its own process

Fall Course: Session Arc

SESSION PRINTED WED 12 AUG 2026

One question on the fall course. Take the whole page.

What can they do in week eight that they could not do in week one?

Not tool skills. Name the capacity.
